Hiring Manager
Waterflow Technology
Durbarmarg, Kathmandu

Dear Sir,

I am writing to express my enthusiastic interest in the AI/ML Engineer position at Waterflow Technology. With a strong foundation in Python, Django, and Django REST Framework, as well as hands-on experience in data analysis and backend development, I am eager to bring my technical skillset and passion for artificial intelligence to your forward-thinking team.

My academic background in Data Science and my recent internship at Prixa Technologies have equipped me with the practical knowledge of machine learning workflows and backend API development. During my internship, I contributed to building scalable APIs and worked on integrating data-driven functionalities experiences that align well with the demands of building and optimizing ML models and maintaining backend infrastructure for AI solutions.

I am particularly excited about the opportunity to work with Large Language Models (LLMs) and computer vision technologies as part of a cross-functional team. I am constantly exploring the latest developments in AI research and have a strong desire to contribute to meaningful, business-driven outcomes. I am confident that my blend of backend development skills, eagerness to learn, and collaborative mindset make me a strong fit for this role.

I would welcome the opportunity to discuss how I can contribute to your AI initiatives and help build innovative, scalable solutions that make a real impact. Thank you for considering my application.

Warm regards,
Bibek Shah
